

Amendments to the Specification:

Please replace the paragraphs beginning at page 1, line 12 with the following amended paragraphs:

One on-line service, Morningstar.com, uses a scatter plot in its Morningstar Investment Radar, ~~URL~~ (http://~~[[/]]~~ *** screen.morningstar.com/InvestmentRadar/InvestmentRadar.html). Each point in the plot represents risk versus capitalization of an asset in a portfolio.

Another on-line facility, FalconEye, ~~URL~~ (http://~~[[/]]~~ *** www.falconeye.com/falconeye/tracker/index.html), displays a periscope-like view of a simulated cloud formation that represents

a multi-dimensional density map of all 6000+ Nasdaq stocks, sorted in real-time by FalconEye Viz-Alerts™ (customizable indicators) that were created for the vertical and horizontal axes. Each stock is like a pixel on the screen and each color represents the density of stocks depicted in that section of the Tracker Live Map. ... The distribution of density allows you to instantly see the real-time technical pressures on the market and gives you the knowledge to trade more efficiently and productively.

ValuEngine, ~~URL~~ (http://~~[[/]]~~ *** valuengine.com/servlet/ValuationSummary#), displays graphs of stock prices that include historical prices to a current date followed by forecast price trends for future periods, including forecast ranges above and below the forecast price trends.
